Manager's 2nd Quarter Report

Capital Improvement Projects have been moving along in 2016. Approximately 4,000 feet of pipe has been updated to 8" ductile iron. The booster pump project is out for bid and good progress has been made on a site and design for the new reservoir.

Two days were spent with Utility Services checking valves, hydrants and water services for possible leaks. Two service line leaks were located and will be repaired.

The warmer than normal weather early in the year brought concern of another drought like 2015. The June rains have kept that concern to a minimum to date. We will keep you updated as the year progresses.

Summer maintenance continues such as clearing of hydrants, valves and meter boxes. All of these need to be accessible at all times, please keep this in mind when landscaping.

Reminder, those that have irrigation systems, boilers, pools or hot tubs the annual backflow tests need to be completed.

If you have any questions or concerns, please call.

Thank you,
Janelle MacDicken
Manager
